～欧州復興開発銀行(EBRD)の経験を中心に”
主催：地球・人間環境フォーラム

Japan, July 2007

TAM/BAS Programme

- Complementary programmes assisting private enterprises in the SME Sector
- Technical assistance programmes operated by the EBRD.
- TAM/BAS Projects with enterprises are 100% Donor Funded
 - TAM: Industry-specific, senior managers from economically-developed countries advise SMEs over a period of 18-24 months.
 - BAS: Teaches businesses to use external business services, Develops local consultancy sector, Facilitate short-term projects with up to USD10,000 of grant.

2

An impressive track record

- Over 13 years in operation
- Carried out over 7,000 projects in 27 countries
 - TAM: 1,443 projects in 27 countries
 - BAS: 5,995 projects in 18 countries
- Supported enterprises with an aggregate annual turnover of €30 billion and about 1.45 million employees
- Raised €162 million of donor funding
- Japan has been the biggest bi-lateral donor providing over €24 million
 - TAM: Western Balkans, Central Asia, Far East Russia
 - BAS: Uzbekistan, Kazakhstan, Far East Russia

3

TAM/BAS Environmental projects

TAM:

- A TAM Environmental Protection (EP) and Energy Efficiency (EE) Programme has been operating with Japanese funding since 2004.
- The programme is aimed at utilizing Kyoto Mechanisms, working in heavily polluted regions, promoting international environmental management and health & safety

BAS:

- BAS is implementing an EAR funded Enviro Programme in FYR Macedonia helping SMEs move into compliance with the EU Integrated Pollution Prevention and Control (IPPC) Directive.
- BAS provided demand studies and technical assistance for the EBRD/Global Environmental Facility (GEF) Programme in Danube River Basin

4

TAM/BAS Environmental projects

Industry break down example of EAR funded IPPC Initiative, Macedonia

Supported 69 BAS environmental projects

Country break down example of Japan funded TAM projects

TAM Environmental Projects - Japan Funded

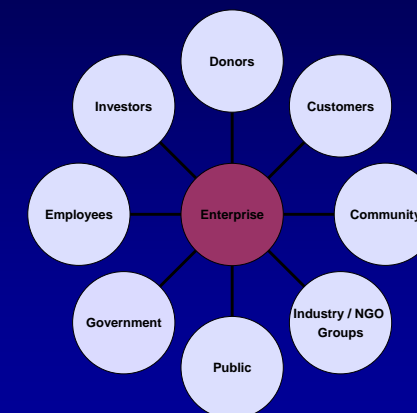

28 projects distributed to 10 countries.

5

Visibility to Stakeholders

- TAM/BAS disseminates information about its activities and creates public awareness campaigns through setting up workshops, press conferences/releases and presenting to industry/NGO meetings and seminars in the countries of operation

6

Case Study

A Shipyard, Montenegro (TAM – Japan Funded)

- Problem: Hazardous waste generation through oil contaminated waste water and safety concerns from chemical substances used required a environmental management system to be introduced
- Project involved national and local government and local community
- TAM upgraded treatment facilities achieving 90% reduction in oil and air pollution, halving waste accumulation and significantly reduced leaking of chemicals

Regional Heating, Macedonia – (TAM – Japan Funded)

- Problem: 6000 EUR per day loss due to water leak from 180km district heating pipeline.
- Leakage detection tools were introduced and relevant training was provided.
- Successfully the technology accepted and two beneficial spin-offs are created. 1. Jobs during off-season 2. Detection service business
